Nazwa	**Barco MDP-471/4 28" fan-less LCD main display for air traffic control (ATC)**
Cena	**0,00 zł**
Producent	**Barco**

OPIS PRODUKTU

Since its introduction in 2000, Barco's 2Kx2K main display for ATC controller working positions has become the world's leading ATC display both in new installations and as a direct replacement for the Sony DDM CRT display.
Unequaled image quality
MDP-471/4 always features the latest LCD panel technologies, presenting an ergonomic solution for ATC controller workstation positions. The 4 MegaPixel LCD screen offers brightness uniformity in white, gray, and black images and ensures zero bright dot defects. A wide viewing angle, high contrast, and absolutely no reflection help you observe every track, enhance user comfort and reduce eye-fatigue.
Unique design
The fan-less design of the 2Kx2K main display ensures noiseless operation in an open architecture for improved operator comfort. All cables are hidden and connectors are easily accessible. The display's slim design, low weight and mechanical flexibility provide control center designers with a new degree of freedom to reduce plant and energy costs.
Green performance
MDP-471/4 displays use mercury-free and energy-saving LED backlights, reducing power consumption by 20%. The displays produce no heat and feature near-zero energy consumption when not in active use.
Smart obsolescence management
MDP-471/4 has an extremely low life cycle cost. It has been built with non-wearable components and comes with a 5-year warranty.
