Mission Display Unit**

Cena

0,00 zł

Producent

Barco

OPIS PRODUKTU

The MDU-268 is an avionics-grade 6x8 inch Mission Display Unit derived from Barco's field-proven CHDD family. The MDU-268 has both a digital video input (DVI) and most of the currently available analog video inputs (Composite, RGB, STANAG,...).

Equipped with the latest, sunlight-readable AMLCD technology, the MDU-268 delivers excellent brightness and contrast values, as well as a wide viewing angle of 80° in all directions. It allows the same unit to be used in portrait as well as landscape mode.

Compatible with FLIR, daylight video cameras, moving maps, computers and radar, the MDU-268 Display Unit offers a dedicated imaging solution, wherever your mission takes you. The unit is DO-178B and DO-254 certified up to level C for the DVI input.

Features

6 x 8 inch XGA screen (> 125 dpi)

Multiple configurable inputs:

1 Digital video input (DVI)

Up to 6 analog video inputs

Night vision compatibility (optional)
