Nazwa	**OPScenter Safety Net Efficient technology to avoid dangerous situations in air traffic management**
Cena	**0,00 zł**
Producent	**Barco**

OPIS PRODUKTU

With increasing complexity of air and waterways traffic, controllers need automated tools that enhance safety and reduce their workload. OPScenterTM Safety Netprovides comprehensive tools that help to detect possible traffic conflicts in all fields of mission critical applications
Safety Net functions comprise
Short Term Conflict Alert (STCA) within configurable look-ahead times
Area Proximity Warning (APW)
Minimum Safe Altitude Warning (MSAW)
The heart of Safety Net is a Conflict Detection Engine that continuously analyses the traffic situation and calculates different conflict types for all traffic objects. Safety Net provides adequate warning times while minimizing nuisance alerts. All sub-components can easily be integrated into existing systems and customized to individual needs.
